

R package `rrtable`

Keon-Woong Moon

2018-04-15 01:12:59

```
require(moonBook)
require(ztable)
require(rrtable)
require(ggplot2)
options(ztable.type='latex')
```

Introduction

If you are a data scientist or researcher, you will certainly be interested in reproducible research. R package `rrtable` makes it possible to make reports with HTML, LaTeX, MS word or MS Powerpoint formats from a table of R codes.

Package Installation

You can install R package `rrtable` with the following command.

```
if(!require(devtools)){ install.packages("devtools") }
devtools::install_github("cardiomoon/rrtable")
```

Package Loading

You can load the `rrtable` package with the following R command.

```
require(rrtable)
```

Sample Data

Sample data `sampleData3` is included in `rrtable` package. You can see the `sampleData3` by following R command.

```
str(sampleData3)
```

```
'data.frame': 15 obs. of 5 variables:
 $ type : chr "title" "subtitle" "author" "text" ...
 $ title : chr "" "" "" "Introduction" ...
 $ text : chr "R package `rrtable`" "Reproducible Research with a Table of R codes" "Keon-Woong Moon"
 $ code : chr "" "" "" "" ...
 $ option: chr "" "" "" "" ...
```

Paragraph

You can make a paragraph with this data

`ztable3(sampleData3)`

type	title		text	code	option
title			R package 'rrtable'		
subtitle			Reproducible Research with a Table of R codes		
author			Keon-Woong Moon		
text	Introduction		If you are a data scientist or researcher, you will certainly be interested in reproducible research. R package 'rrtable' makes it possible to make reports with HTML, LaTeX, MS word or MS Power-point formats from a table of R codes.		
header2	Package Installation	In-	You can install R package 'rrtable' with the following command.	<pre>if(!require(devtools)){ install.packages("devtools") }</pre>	echo=TRUE, eval=FALSE
header2	Package Loading		You can load the 'rrtable' package with the following R command.	<pre>devtools::install_github("cardiomoon/rrtable") require(rrtable)</pre>	echo=TRUE
header2	Sample Data		Sample data sampleData3 is included in rrtable package. You can see the sampleData3 by following R command.	<pre>str(sampleData3)</pre>	echo=TRUE, eval=TRUE
table	Paragraph		You can make a paragraph with this data	<pre>df2flextable3(sampleData3)</pre>	landscape=TRUE
mytable	mytable	object	You can add mytable object with the following R code.	<pre>mytable(Dx~,data=acs)</pre>	
plot	Plot		You can insert a plot into your document.	<pre>plot(iris)</pre>	
ggplot	ggplot		You can insert a ggplot into a document	<pre>ggplot(iris,aes(x=Sepal.Length,y=Sepal.Width,color=Species)) geom_point()</pre>	
Rcode	R code		You can insert the result of R code. For example, you can insert the result of regression analysis.	<pre>fit=lm(mpg~wt*hp,data=mtcars) summary(fit)</pre>	
2ggplots	Two ggplots		You can insert two parallel ggplots with the following code.	<pre>ggplot(iris,aes(Sepal.Length,Sepal.Width))+geom_point() ggplot(iris,aes(Sepal.Length,Sepal.Width,colour=Species))+geom_point()+guides(colour=FALSE)</pre>	
2plots	Two plots		You can insert two parallel plots with the following code.	<pre>hist(rnorm(1000)) plot(1:10)</pre>	
header2	HTML Report		You can get report with HTML format(this file) by following R command.	<pre>data2HTML(sampleData3)</pre>	echo=TRUE, eval=FALSE

mytable object

You can add mytable object with the following R code.

```
result= mytable(Dx~.,data=acs)
print(ztable(result,longtable=TRUE),type='latex')
```

Plot

You can insert a plot into your document.

```
plot(iris)
```

ggplot

You can insert a ggplot into a document

```
ggplot(iris,aes(x=Sepal.Length,y=Sepal.Width,color=Species))+ geom_point()
```

R code

You can insert the result of R code. For example, you can insert the result of regression analysis.

```
fit=lm(mpg~wt*hp,data=mtcars)
summary(fit)
```

Call:

```
lm(formula = mpg ~ wt * hp, data = mtcars)
```

Residuals:

Min	1Q	Median	3Q	Max
-1.5	0.5	0.8	1.2	2.5

-3.0632 -1.6491 -0.7362 1.4211 4.5513

Coefficients:

	Estimate	Std. Error	t value	Pr(> t)
(Intercept)	49.80842	3.60516	13.816	5.01e-14 ***
wt	-8.21662	1.26971	-6.471	5.20e-07 ***
hp	-0.12010	0.02470	-4.863	4.04e-05 ***

Signif. codes: 0 '***' 0.001 '**' 0.01 '*' 0.05 '.' 0.1 ' ' 1

Residual standard error: 2.153 on 28 degrees of freedom

Multiple R-squared: 0.8848, Adjusted R-squared: 0.8724

F-statistic: 71.66 on 3 and 28 DF, p-value: 2.981e-13

Two ggplots

You can insert two parallel ggplots with the following code.

```
ggplot(iris,aes(Sepal.Length,Sepal.Width))+geom_point()  
ggplot(iris,aes(Sepal.Length,Sepal.Width,colour=Species))+ geom_point()+guides(colour=FALSE)
```

Two plots

You can insert two parallel plots with the following code.

```
hist(rnorm(1000))  
plot(1:10)
```

HTML Report

You can get report with HTML format(this file) by following R command.

```
data2HTML(sampleData3)
```
