R package rrtable

Reproducible Research with a Table of R codes

Keon-Woong Moon 2018-04-15 17:11:43

```
require(moonBook)
require(ztable)
require(rrtable)
require(ggplot2)
options(ztable.type='latex')
```

Introduction

If you are a data scientist or researcher, you will certainly be interested in reproducible research. R package rrtable makes it possible to make reports with HTML, LaTex, MS word or MS Powerpoint formats from a table of R codes.

Package Installation

You can install R package rrtable with the following command.

```
if(!require(devtools)){ install.packages("devtools") }
devtools::install_github("cardiomoon/rrtable")
```

Package Loading

You can load the rrtable package with the following R command.

```
require(rrtable)
```

Sample Data

Sample data sampleData3 is included in rrtable package. You can see the sampleData3 by folllowing R command.

```
str(sampleData3)
```

```
'data.frame': 15 obs. of 5 variables:
$ type : chr "title" "subtitle" "author" "text" ...
$ title : chr "" "" "" "Introduction" ...
$ text : chr "R package `rrtable`" "Reproducible Research with a Table of R codes" "Keon-Woong Moon"
$ code : chr "" "" "" "" ...
$ option: chr "" "" "" "" ...
```

Paragraph

You can make a paragraph with this data

ztable2(sampleData3)

Plot

You can insert a plot into your document.

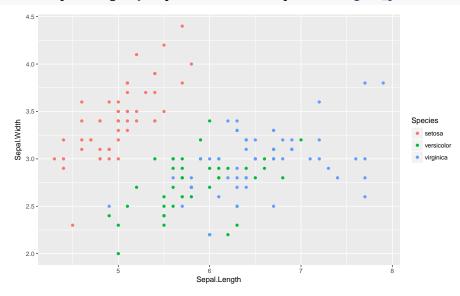

plot(iris)

ggplot

You can insert a ggplot into a document

ggplot(iris,aes(x=Sepal.Length,y=Sepal.Width,color=Species))+ geom_point()

R code

You can insert the result of R code. For example, you can insert the result of regression analysis.

```
fit=lm(mpg~wt*hp,data=mtcars)
summary(fit)
```

```
Call:
lm(formula = mpg ~ wt * hp, data = mtcars)
Residuals:
    Min    1Q Median    3Q Max
```

```
-3.0632 -1.6491 -0.7362 1.4211 4.5513
```

Coefficients:

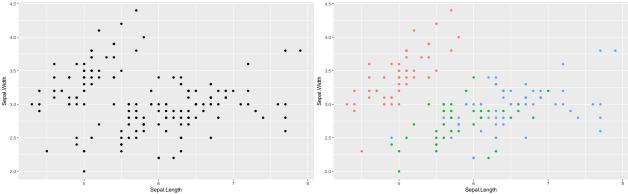

```
Estimate Std. Error t value Pr(>|t|)
(Intercept) 49.80842
                        3.60516 13.816 5.01e-14 ***
            -8.21662
                        1.26971
                                -6.471 5.20e-07 ***
wt
            -0.12010
                        0.02470
                                -4.863 4.04e-05 ***

             0.02785
                        0.00742
wt:hp
Signif. codes: 0 '*** 0.001 '** 0.01 '* 0.05 '.' 0.1 ' ' 1
```

Residual standard error: 2.153 on 28 degrees of freedom Multiple R-squared: 0.8848, Adjusted R-squared: 0.8724 F-statistic: 71.66 on 3 and 28 DF, p-value: 2.981e-13

Two ggplots

You can insert two parallel ggplots with the following code.

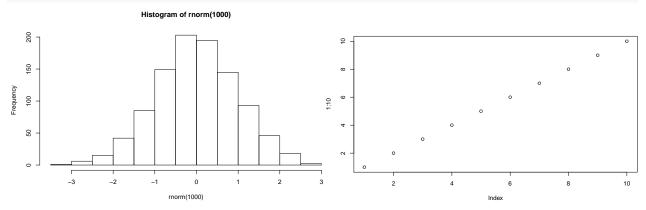

```
ggplot(iris,aes(Sepal.Length,Sepal.Width))+geom_point()
ggplot(iris,aes(Sepal.Length,Sepal.Width,colour=Species))+ geom_point()+guides(colour=FALSE)
```

Two plots

You can insert two parallel plots with the following code.

```
hist(rnorm(1000))
plot(1:10)
```

HTML Report

You can get report with HTML format (this file) by following R command.

data2HTML(sampleData3)
